| Similarity and congruence in 2D 3 lessons |  |  |  |
| Content (Intent) |  |  |  |
| Prior Learning <br> Year 9 Similarity and congruence February | Future Learning |  |  |
| Objectives <br> - Use the basic congruence criteria for triangles (SSS, SAS, ASA and RHS); <br> - Solve angle problems involving congruence; <br> - Identify shapes which are similar; including all circles or all regular polygons with equal number of sides; <br> - Understand similarity of triangles and of other plane shapes, use this to make geometric inferences, and solve angle problems using similarity; <br> - Identify the scale factor of an enlargement of a shape as the ratio of the lengths of two corresponding sides; <br> - Understand the effect of enlargement on perimeter; <br> - Solve problems to find missing lengths in similar shapes; <br> - Know that scale diagrams, including bearings and maps are 'similar' to the real-life examples. |  |  |  |
| Pedagogical notes (implementation) | How will understanding be assessed \& recorded (Impact) |  |  |
| Use simple scale factors that are easily calculated mentally to introduce similar shapes. | End of half term no End of Year 2 ${ }^{\text {nd }}$ mocks in Feb \& March |  |  |
| Reinforce the fact that the sizes of angles are | How can parents help at home? |  |  |
| Make links between similarity and trigonometric ratios. | MathsWatch clips <br> Qualification KS3: R10, G31 <br> Qualification KS4: $\quad 12 b, 144,148,166$ |  |  |
